The week prior to this download and implementation, an aggressive training schedule will take place to prepare the staff for live activation on 8 May. Administrative staff will be trained during the month of April, but due to mandatory training of our medical staff during the month of April all providers will be trained from 1 May through 5 May. This training will impact on availability of appointments that week, but this training is crucial in the successful conversion from the current electronic consult processes to the new processes. This will not impact on any acute care or emergency treatment that our patients may require. As with all new systems, some problems will be noted during the first month, once these are identified and actions are taken to correct them, the system will enhance the capabilities of MACH to facilitate consults and follow the movement of the consults to complete closure in an efficient and expeditious manner.
